## Bar Linkages Kit

***For students to assemble and understand different bar linkage mechanisms***

- One of a series of 18 kits for experiments in fundamental engineering science topics
- For use on any engineering course from foundation to postgraduate
- Flexible and modular with sensible size parts – each kit fits onto the Work Panel (ES1) for experiments and simple classroom demonstrations
- Supplied in a hard-wearing storage tray with moulded insert to hold parts securely and a graphical list to help check the kit contents
- Rugged and durable parts for safe ‘hands-on’ experiments – allowing better understanding
- Contains an assortment of different length bar ‘links’ and joints needed for over 10 suggested experiments in bar linkages

- TecEquipment Ltd, Bonsall Street, Long Eaton, Nottingham NG10 2AN, UK

- An ISO 9001 certified company

# ES15

## Bar Linkages Kit

### Description

This versatile kit is part of a series that allows many experiments using different arrangements of their parts. Students, teachers or lecturers fit the parts of the kit to the Work Panel (ES1) (supplied separately) to study or show an engineering science topic.

This kit includes a selection of over 20 perforated bars of different lengths and pivots or 'joints' to allow students to create an unlimited choice of linkages.

Students assemble the bars and joints in any arrangement and note how the linkage converts movement from one form to another (for example; rotary motion to linear motion). Bar linkages are one of the most basic mechanisms used in mechanical engineering.

The kit includes magnetic 'wipeable' sheets and holders for non-permanent markers so the student can trace the relative movements of the linkages or joints.

The kit introduces students to key engineering terms such as four-bar linkages, rotary and linear movement, and planar linkages.

TecEquipment supplies a CD-ROM with the Work Panel (ES1). It includes all the worksheets, guidance notes and lecturer notes (with answers) needed for typical experiments with each kit. The selection of parts in the kits and the choice of fixing points on the Work Panel means that teachers or lecturers may extend the experiments to an even greater range.

**Note:** The kit is for use with the ES1 Work Panel (supplied separately).

### Standard Features

- Five-year warranty
- Manufactured in accordance with the latest European Union directives

### Experiments

- Four-bar linkages – crank rocker, double rocker, drag link and parallelogram
- Straight line linkages – Watt's straight line, Chebyshev, Peaucellier-Lipkin, Hart's inversor, Robert's and Hoeken's
- Pantograph
- Ackermann steering

### Operating Conditions

*For use in:*

Well lit classroom or laboratory

*Storage temperature range:*

-25°C to +55°C (when packed for transport)

*Operating temperature range:*

+5°C to +40°C

*Operating relative humidity range:*

80% at temperatures < 31°C decreasing linearly to 50% at 40°C

### Essential Services

A level bench or desktop of at least 500 mm wide x 500 mm front to back.

### Essential Base Unit

Work Panel (ES1)

### Specifications

*Storage tray (with clip-on lid):*

450 mm x 320 mm x 85 mm

*Nett weight:*

3.6 kg

*Packed volume and weight:*

Approximately 0.015 m<sup>3</sup> and 4.1 kg

*Main parts:*

- 4 bars with 17 holes
- 6 bars with 13 holes
- 6 bars with 9 holes
- 6 bars with 5 holes
- Joints and pen holders
- Magnetic wipeable sheets
- Non-permanent markers
- Screwdriver and spanner
