For use with the Engineering Science kits, TecEquipment offers these supporting products as a useful resource for lecturers or teachers.

Storage Unit (EST)

A mobile trolley for use with the Engineering Science kits. This trolley allows teachers or lecturers to safely and tidily store up to 24 trays in one mobile unit.

The trolley allows one person to push all the trays from one room to another. It has extra space on top with fixing points so it may also carry or hold Work Panels (ES1).

Its lockable wheels allow it to be both mobile and stable. It allows teachers or lecturers to fit work panels to the top and use the trolley as a mobile demonstration table.

Trays and Lids (ETL)

A set of five trays and lids. Identical to those used for the kits, so they fit and stack in the same way. These trays and lids are useful to safely store ancillaries, writing materials or A4 size printed material.

Standard Features

- Five-year warranty
- Manufactured in accordance with the latest European Union directives
