

Course

ATR 42-320 / 72-500P

AIRCRAFT TYPE TRAINING

Course Description

ATR 42 / 72 Type Training is an interactive state-of-the-art web based training and is designed to develop skills, knowledge and performance among flight crew personnel.

The course is designed to **AICC** and **SCORM** standards and combines rich multimedia graphics with limited use of text, audio narration and a high degree of interactive elements. Lesson Objectives and Knowledge Checks complete each individual chapter.

Training Areas

- Initial pilot training
- Recurrent or refresher training
- Maintenance familiarization training (*ATR 42 only*)
- Performance training

Application

Simulation and multimedia content can be used either as a **standalone training via the Internet or Intranet** or as an aid to instructors for **classroom training**. The backbone of the Course is the **Learning Management System (LMS)** which allows the person responsible for the training to **organize, track** and document all training activities.

Study progress, the total time spent, the attempts per lesson, the stage test results and the general progress of each trainee are constantly monitored and documented by the Learning Management System to the satisfaction of the authority. Your Quality- and Recordkeeping System.

Course Duration

42 hours for initial pilot training

The recurrent training depends on the subjects selected

8 hours for maintenance familiarization training (*ATR 42 only*)

8 hours for performance training
