Course Description

Objective

Target Group

Course Content

Course Duration

ATR 72-500P

Technical Course / Aircraft Type Training

The course is designed to **AICC** and **SCORM** standards and combines rich multimedia graphics with limited use of text, audio narration and a high degree of interactive elements. Lesson Objectives and Knowledge Checks complete each individual chapter.

Upon completion of this course the trainee will have an understanding and knowledge of the ATR 72, its systems, layout and limitations.

This training is recommended for Flight Crew Members.

The course includes following topics:

- Introduction to the ATR 72, Aircraft General
- MFC, CCAS
- Pneumatic, Pressurization and Air Condition
- AFCS
- Communication
- TCAS
- Electrical System
- Emergency Equipment
- Fire Protection
- Flight Controls, Flight Instruments
- Fuel System
- Hydraulic
- Ice & Rain Protection
- Landing Gear
- Navigation
- GNSS
- Powerplant
- Limitations

The course content can also be used as recurrent training.
