Course Description

Objective

Target Group

Course Content

Course Duration

ATR 72-500P

Flight Performance and Flight Planning

The course is designed to **AICC** and **SCORM** standards and combines rich multimedia graphics with limited use of text, audio narration and a high degree of interactive elements. Lesson Objectives and Knowledge Checks complete each individual chapter.

Upon completion of this course the trainee will have an understanding and knowledge of the ATR 72 performance capabilities. He will know how to calculate performance requirements and will be able to perform the flight planning requirements.

This training is recommended for Flight Crew Members and Flight Operations Officer.

The course includes following topics:

- Introduction to the ATR 72
- Aircraft Limitations
- Speeds
- Power Setting
- Take Off
- Climb
- Cruise
- Holding
- Descent and Approach
- Landing and Go Around
- One engine inoperative
- General Flight Planning requirements
- Flight levels and altitudes
- Special operation

The course content can also be used as recurrent training.
