

Course

Course Description

Objective

Target Group

Course Content

Course Duration

ATR 72-600P

Technical Course / Aircraft Type Training

The course is designed to **SCORM** standards and combines rich multimedia graphics with limited use of text, audio narration and a high degree of interactive elements. Lesson Objectives and Knowledge Checks complete each individual chapter. The course can be used for initial and recurrent training.

Upon completion of this course the trainee will have an understanding and knowledge of the ATR 72-600, its systems, layout and limitations.

This training is recommended for Flight Crew Members

The course includes following topics:

- Dimensions & Areas
- Air Condition
- Autoflight
- Communications
- Equipment & Furnishing
- Fire Protection
- Hydraulic Power
- Landing Gear
- Lights
- Water & Waste
- Doors
- Indicating & Recording Systems
- Power Plant
- Performance
- Electrical System
- Fuel System
- Ice & Rain Protection
- Flight Controls
- Instruments & Navigation
