Course Duration

Aviation Security Training

The **Aviation Security Training** is a specialized **Flight Operations Training**. The training focuses on security in aviation including airports, passenger, cargo as well as in flight security and is based on existing **ICAO** as well as **European regulations**. At the end of the course the users will understand the common rules to **protect civil aviation against acts of unlawful interference** that jeopardise the security of civil aviation.

The main underlying regulations in Europa and also for this training are:
REGULATION (EC) No 300/2008, COMMISSION REGULATION (EU) No 185/2010, and COMMISSION REGULATION (EC) No 272/2009 of April 2009 Decision 2010/774/EU

The Aviation Security Course is available for single user or corporate user, especially for:

- Flight and Cabin Crews
- Ground Operations personnel
- All entities applying aviation security standards

The security training content is presented in simplified English and can be anytime implemented into the initial as well as recurrent training. It consists of 2 parts and is fully multimedia based.

The course follows the appropriate European Regulation and includes following topics:

- Introduction to Aviation Security
- Relevant legal requirements
- Airport Security
- Aircraft Security
- Passengers and Cabin Baggage
- Hold baggage
- Prohibited Articles
- Cargo and Mail
- Air carrier mail and air carrier material
- In flight supplies
- In-Flight security measures
- Methods and procedures for potentially disruptive passengers
