

CONTROLLED FLIGHT INTO TERRAIN (CFIT)

Course Description

Controlled Flight into Terrain, or CFIT, occurs when an airworthy aircraft under the control of a pilot is flown unintentionally and without prior awareness into terrain, water, or an obstacle.

eL-hub's course on CFIT familiarises pilots with the key factors in the successful avoidance of CFIT accident prevention strategies.

Target Audience

Flight crew

Course Content

1. Module Introduction
2. Factors causing CFIT
3. Enhanced Ground Proximity Warning System
4. CFIT Avoidance
5. Module Summary

QUICK FACTS

- Self-paced, visually rich, and engaging eLearning course
- Runs on iPad, Laptops and PC's
- Available in Initial versions
- Topics can be selected for Recurrent training
- Final Test and Certification offered
- Customization available as per airline specific and regulatory requirements.

Course Duration: 1 Hour

Training Type: Initial
