

## Course

# Contaminated Runway & Runway Reports

### Course Description

The course "Contaminated Runway and Runway Reports" has been developed to familiarize and update flight crew member with the special requirements when operating from and into contaminated runways.

The backbone of this course is the Learning Management System (LMS) which allows the organization, tracking and documentation of the training activities. Self-assessment questions are directly linked to the multimedia-based training allowing the student to check his knowledge and understanding.

### Course Topics

#### The training covers the following topics:

- Contaminated runway incl. effects on V1 & VMCG, limitations and friction coefficient
- Hydroplaning principles and effects
- Reporting methods incl. SNOWTAM and MOTNE

### Target Groups

Flight Crew

### Course Duration

30 minutes
