

## Course

# EMBRAER ERJ 145

AIRCRAFT TYPE TRAINING

## Course Description

**EMBRAER ERJ 145 Type Training** is an interactive state-of-the-art web based training and is designed to develop skills, knowledge and performance among maintenance and flight crew personnel.

The course is designed to **AICC** and **SCORM** standards and combines rich multimedia graphics with limited use of text, audio narration and a high degree of interactive elements. Lesson Objectives and Knowledge Checks complete each individual chapter.

## Training Areas

- Initial maintenance training
- Initial pilot training
- Familiarization training
- Recurrent or refresher training
- Performance training

## Application

Simulation and multimedia content can be used either as an aid to instructors for classroom training or for standalone training via the Inter- or Intranet. The backbone of the Course is the **Learning Management System (LMS)** which allows you to organize, track and document your training activities. Study progress, the total time spent, the attempts per lesson, the stage test results and the general progress of each trainee are constantly monitored and documented by the Learning Management System to the satisfaction of the authority.

### Your Quality- and Recordkeeping System

## Course Duration

50 hours for initial maintenance training  
40 hours for initial pilot training  
15 hours for familiarization training  
The recurrent training depends on the subjects selected.
