

Course

Course Description

High Performance Single-Pilot Aeroplane

The HPA course is of a combination of **multimedia-based training, questions, textbooks and examinations**, all managed and documented by our **Learning Management System** providing the instructor with accurate information on the students' training performance.

If available, already existing training material of your organization **can be implemented into the course structure**.

The courses follow the requirements of **Part FCL**. The integrated question bank contains around **300 questions covering all learning topics** and is divided into the appropriate course modules.

The **backbone** of the HPA course is the **Learning Management System (LMS)** which allows the organization, tracking and documentation of the training activities. **Accompanying textbooks** contain additional practical examples and information.

The **question bank** which is directly linked to the multimedia-based training **checks the students' progress** and prepares them for examinations.

infoWERK's HPA course

fulfils the requirements of AMC1 ORA.ATO.300 including:

- A Progress Test for each subject for every 15 hours of study
- A recommended course structure and order of teaching
- Additional self-assessment test which allows the student to review his knowledge
- The possibility to contact the appropriate instructor (contact times)
- The requirement to offer documentation which allows the department head to evaluate the students' training to ensure that he achieves the required training standard
- The possibility for the instructor to monitor the students' progress

Course Content

The HPA course is divided into 6 Training Modules

and covers the following topics: *(according AMC1 FCL.720.A(b)(2)(i))*

- Aircraft General Knowledge
- Flight Performance
- Human Performance
- Meteorology
- Radio Navigation
- Principles of Flight

Summary

This unique combination of different training elements contains various advantages for your flight training organization:

- High quality training material based on infoWERK's experience
- One set of books, questions and web-based training
- Customized layout of books and web-based training
- Integrated quality- and recordkeeping system
- Mobile self-paced learning possibility for students
- Scheduling flexibility
- Cost saving by reducing personnel and office expenses
- Additional revenue through the sale of learning material
- No investment to produce all the material by yourself
