- **Examination System** *(optional)*

- **‚iv-teach' – Virtual Classroom** *(optional)*

Example for performance analysis of students

PRODUCT INFORMATION

Key features

infoWERK's LMS supports and is in compliance with open **standards such as AICC** (Aviation Industry CBT Committee) **and SCORM** (Sharable Content Object Reference Model)

The module-based course structure allows instructors **rapid generation of courses, online assessments, file exchange, integration of additional contents and exercises or editing of courses** in real-time.

The system is highly extensible and its robust architecture can support an **extremely large number of students.**

In one system you can enroll, manage, communicate, test, report and **even give live-instructions** (Virtual Classroom ‚iv-teach').
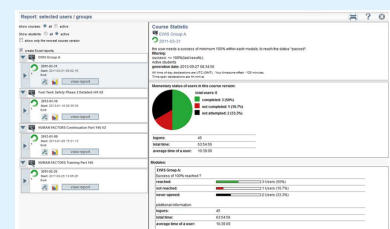

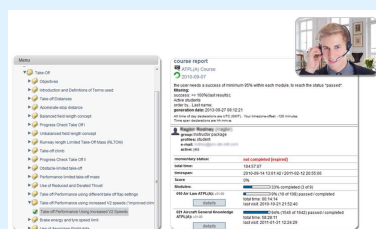

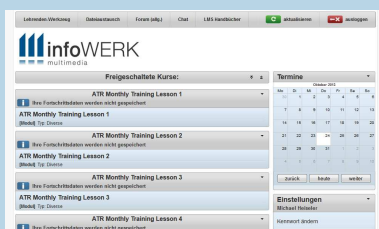

Various communication tools such as **e-mail distributor, forum** or **chat** also include accurate and historic record keeping of all questions and answers amongst students and instructors.

Further features

- Different **user profiles** (student, instructor, controller, etc.)
- Setting of **locksteps** and **time limits** for courses
- **Multi-language** user support
- **Calendar** function
- **Automatic messaging** system
- **Customization**
