

POLAR OPERATIONS

Course Description

The Polar Operations course helps to understand the topography, routing and communications within polar regions, while also explaining difficulties associated with polar operations.

eL-hub's course on Polar Operations familiarises pilots with key factors like cold fuel management, navigation requirements, communication methods used and other various challenges while operating in polar regions.

Target Audience

Flight crew

Course Content

1. Module Introduction
2. Topography & Routing
3. Cosmic Radiations
4. Cold Fuel Management
5. Nav & General Operations
6. Communications
7. Temp – Altitude
8. Polar Emergency
9. Module Summary

QUICK FACTS

- Self-paced, visually rich, and engaging eLearning course
- Runs on Laptops and PC's
- Available in Initial versions
- Topics can be selected for Recurrent training
- Final Test and Certification offered
- Customization available as per airline specific and regulatory requirements.

Course Duration: 1 Hour

Training Type: Initial

Peak Pacific, a global leader in aviation training, in partnership with **Finnair Flight Academy**, a trusted training partner for economical operations and an EASA approved ATO organization, offers a wide range of high quality aviation content library.
