

## Course

### Course Description

# Smoke and Smell Generic Training

**Smoke and fire** in an aircraft in flight is a **most terrifying scene**. In the confined environment of an aircraft cabin, the presence of smoke automatically indicates the existence of an emergency situation. There are a number of systems and things that may cause smell, smoke and fire in an aircraft.

This web-based training course was **specially developed** for people whose jobs require an **awareness of smoke and smell** occurring during flight and shall familiarize pilots with the **risks** of smoke and smell in the cockpit, **teach them how to deal promptly with such emergencies**, how to identify the actual source of smoke and smell and how to communicate and coordinate when smoke or smell is discovered.
