

This is to confirm that the

“Runway Surface Condition Assessment and Reporting“

provided by infoWERK Medien & Technik GmbH, setup on the LMS Training Portal is based on the:

requirements of ICAO Circular 355, Assessment, Measurement and Reporting of Runway Surface Conditions, ICAO Guidance on the issuance of SNOWTAM, and ICAO Doc 10064, Aeroplane Performance Manual (APM).

Course content:

- Describe the background to the ICAO GRF
- Differentiate the changing requirements for runway condition assessment and reporting
- Define the major elements of the Runway Condition Assessment Matrix (RCAM)
- Use the RCAM to assess and report on runway surface conditions
- Explain under what circumstances runway condition codes (RWYCC) can be adjusted via a downgrade or upgrade
- Recognize when a Runway Condition Assessment should be conducted
- Describe the steps required to conduct a Runway Condition Assessment
- Determine the RWYCC to be used in the Runway Condition Report (RCR)
- Use a Runway Condition Worksheet to record the data generated by a RCR, including the assignment of RWYCC and the generation of the final RCR.

Course duration: 30 minutes

All requirements and updates are documented in infoWERK's internal Quality Management System.
