## VC Basic | designed for hybrid training

# VC Basic
designed for hybrid training

## The plug-and-play Virtual Classroom Basic system is designed for:

Training session where remote online students meet with a local instructor who is in a room with a small group of local students. (for briefings or small workgroups)

The VC Basic fits also the needs of instructors who frequently give online presentations and want to leave a truly professional impression on their students.

Together with
**didactics experts**
from the university sector

**infoWERK has created this totally new system**

out of our long experience with hardware and software in the areas of conferencing, training and virtual classroom.

**Seamless**
integration

of

**local**
students

instructor

and

**remote**
students

The VC Basic system gives the instructors the tools they need to manage live classes in a hybrid world.

# VC Basic
consists of:

**Presentation & meeting**
display

\+
