VC Software only | designed for hybrid training

# VC Software

designed for hybrid training

## The infoWERK Virtual Classroom Software is designed for:

Those training organizations who want to offer their instructors a solution for online classes, meetings or briefings that are started, integrated and tracked in a SCORM compatible LMS.

infoWERK's VC Software gives your instructors plenty of tools to present & share content and to collaborate with remote students and partners via audio and video.

# Requirements

for the instructor

Standard notebook, Tablet or PC with headset, microphone and webcam.

Up-to-date internet browser with internet access.  
No additional software to download or install.

# Requirements

for the remote students

Standard notebook, Tablet or PC with headset, microphone and webcam.

Up-to-date internet browser with internet access.

No additional software to download or install.
